

OSA - 5331-64

PR-8200
TAP

November 20, 1964
MW-M-940

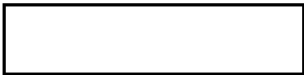

Dear Joe:

SUBJECT: Invention Report for PR-8200

Attached is the final invention report for PR-8200. As you see, there were seven reportable inventions. Of these patent applications have been filed on two, which you will recall were previously submitted to you. A patent application is to be filed on a third one leaving four in which we have decided not to file.

I believe you have the information on all of these. If specific descriptions are needed, they can be furnished.

Regards,
25X1A

Charlie
